Conservatories & Orangeries

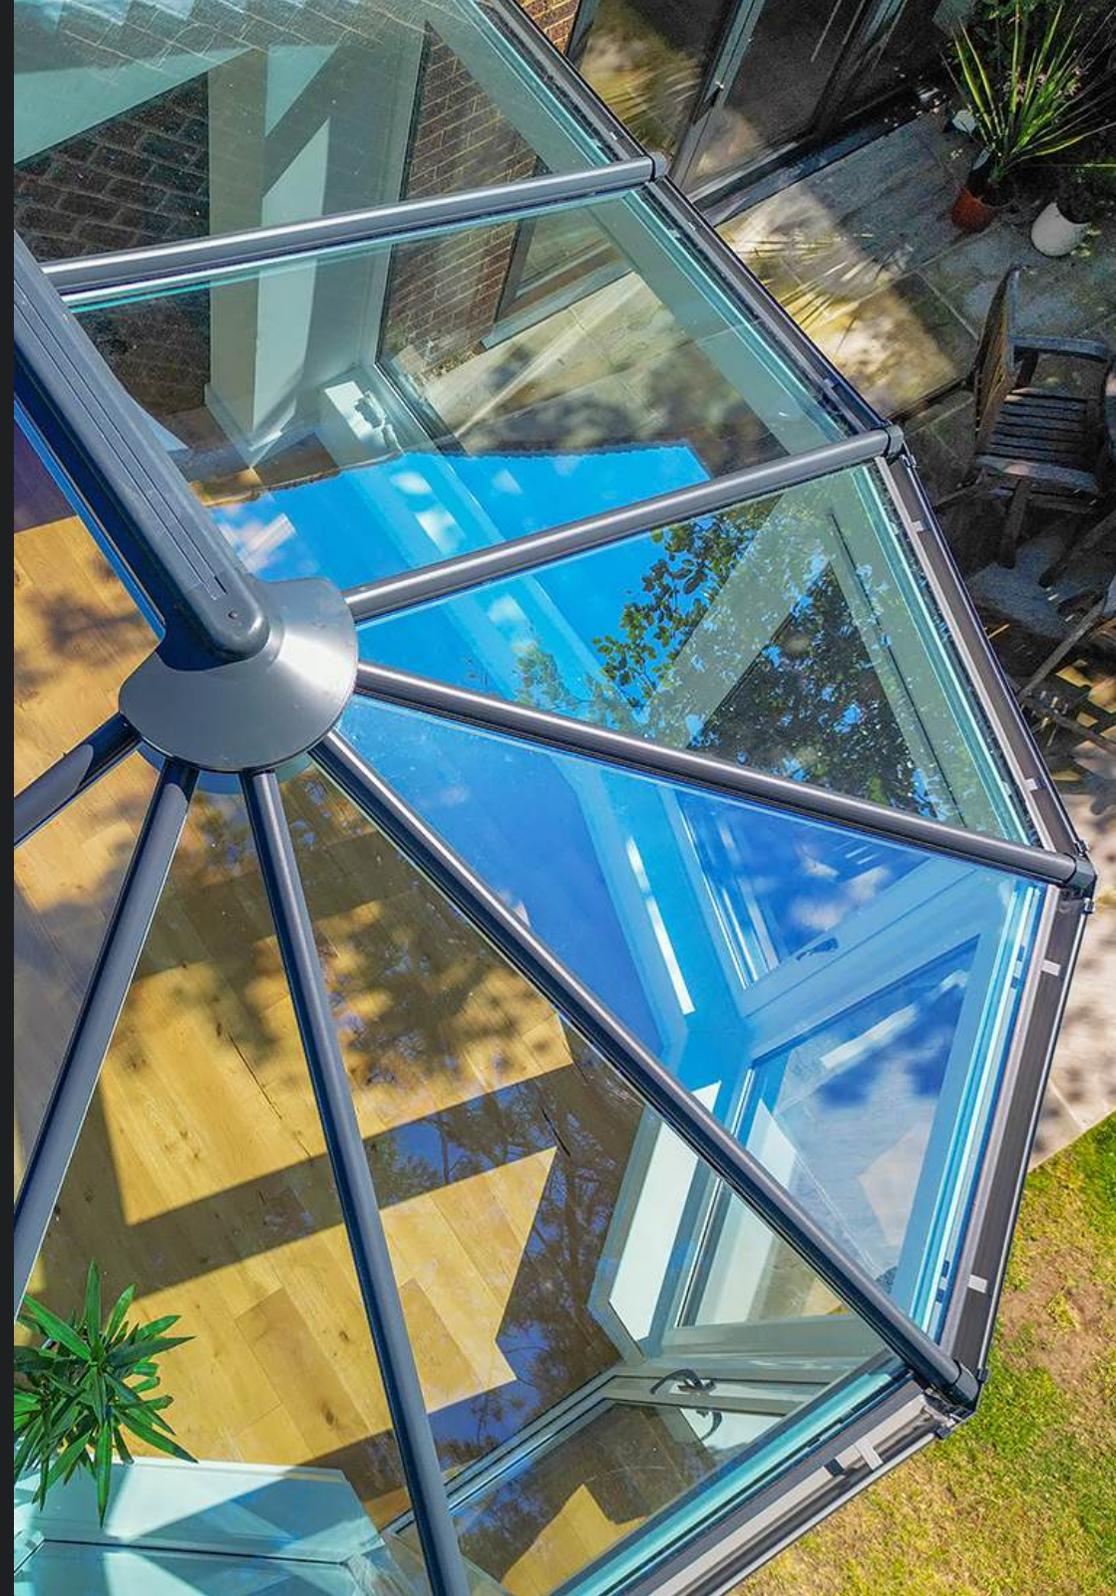

Light-Filled Living, Designed Around You

A conservatory or orangery should be more than just an extra room, it should be a space that enhances how you live in your home every day. At Sheerwater Glass, we specialise in upgrading, refurbishing, and improving existing conservatories and glazed structures, helping homeowners enjoy comfortable, stylish living spaces all year round.

Over time, older conservatories can become difficult to use, suffering from temperature extremes, outdated glazing, or tired finishes. Our expert team works closely with you to reimagine your space, improving thermal performance, natural light, and overall aesthetics while retaining the original character of your home.

With more than 50 years of experience across Surrey and Berkshire, we understand the importance of balancing form and function. Whether you're looking to modernise a traditional conservatory, enhance an orangery, or upgrade glazing and roofing systems, every solution is tailored to your home's architecture and your lifestyle.

From initial consultation through to final installation, we manage every detail with care and precision. Our approach combines proven craftsmanship, modern materials, and thoughtful design, creating elegant glazed spaces that feel welcoming, practical, and beautifully connected to your home.

Orangeries

Elegant Structure. Year-Round Comfort.

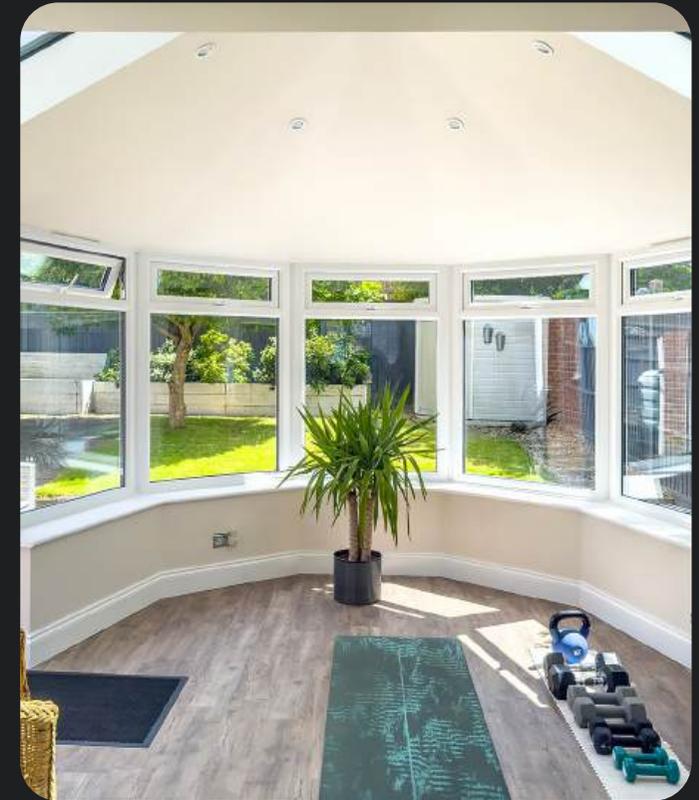

We specialise in upgrading and refurbishing existing orangeries, improving comfort, performance, and visual impact while preserving their architectural character.

Defined by brick pillars, insulated roofs, and generous glazing, our refurbishment solutions enhance insulation and thermal efficiency to create a space that's comfortable all year round.

Available in uPVC or timber, each orangery is tailored to suit your home's style, with finishes and detailing designed to integrate seamlessly with the existing architecture.

Modern glazing, enhanced security, and durable materials combine to create a refined, versatile space that adds lasting value to both your home and your lifestyle.

Garden Rooms

Refined Outdoor Living, Reimagined

Garden rooms offer a unique opportunity to create a peaceful retreat that connects your home with the outdoors. We focus on refurbishing and enhancing existing garden rooms, transforming them into practical, comfortable spaces suited to modern living.

Whether used as a home office, creative studio, gym, or relaxation space, an updated garden room can become one of the most versatile areas of your property. We improve insulation, glazing, roofing, and finishes to ensure year-round usability and lasting comfort.

Our team carefully assesses each structure, recommending thoughtful upgrades that improve warmth, natural light, and durability. High-performance glazing, improved roof systems, and tailored finishes ensure your garden room feels both welcoming and refined.

Every refurbishment is bespoke. We consider how the space is used, its position in the garden, and how it connects visually with your home. The result is a garden room that feels purposeful, elegant, and effortlessly integrated with its surroundings.

Replacement Conservatory Roofs

Comfort That Lasts All Year

A replacement conservatory roof can completely transform how a space feels and functions. If your conservatory is too hot in summer or cold in winter, upgrading the roof is often the most effective solution.

We offer a range of replacement roof systems, including high-performance glass roofs, polycarbonate solutions, and solid warm roofs such as ICOTHERM and Guardian Roofs. Each option is designed to dramatically improve insulation while maintaining natural light.

Solid warm roofs create a more extension-like feel, reducing temperature fluctuations and external noise. Carefully positioned glazed panels ensure brightness without compromising comfort, allowing the space to be enjoyed throughout the year.

Our roof replacements are designed to integrate seamlessly with existing structures, improving performance without unnecessary disruption. With expert installation and premium materials, your conservatory becomes a truly liveable space once again.

Roof Glass

Natural Light, Perfectly Controlled

Roof glass plays a vital role in the look, feel, and performance of any glazed space. We specify and install advanced glazing solutions that flood interiors with natural light while managing heat, glare, and year-round comfort.

Our high-performance options include solar-control coatings, low-emissivity glass for better insulation, specialist tints to balance light, and self-cleaning glass for minimal maintenance. Each solution is chosen to suit the orientation, size, and use of your space, ensuring optimal performance in every season.

Whether part of a conservatory refurbishment, orangery upgrade, or roof lantern, our glazing transforms your space into a bright, welcoming environment that remains comfortable even in extreme temperatures.

Expert installation ensures a precise fit, flawless finish, and long-term durability. With Sheerwater Glass, roof glazing is more than practical, it's a defining feature, combining elegance, light, and comfort.

Roof Lanterns & Flat Roof Glass

Architectural Impact, Minimal Structure

Roof lanterns and flat rooflights introduce height, openness, and architectural interest to glazed living spaces. Designed to maximise natural light while maintaining excellent thermal performance, they create rooms that feel lighter, brighter, and more spacious.

Our roof lanterns feature slim aluminium frames that prioritise glass over structure, allowing daylight to pour deep into the room. Ideal for orangeries, extensions, and open-plan living areas, they add a striking focal point while enhancing everyday comfort.

Flat roof glass provides a clean, contemporary alternative, delivering uninterrupted views of the sky with discreet framing. Both options are available with advanced glazing specifications, including solar control, thermal insulation, and self-cleaning finishes.

Every roof lantern and rooflight is carefully tailored to suit the proportions and style of your home. A wide choice of frame finishes and glass options ensures seamless integration with both traditional and modern architecture.

Installed by our experienced team, these solutions combine visual impact with practical performance, bringing natural light, balance, and refinement into your living space.

Roofline

Protection, Performance & Peace of Mind

Your roofline plays a vital role in protecting your home from the elements while contributing to its overall appearance. We have been replacing fascias, soffits, guttering, and cladding for over 25 years, delivering durable, low-maintenance solutions with lasting results.

Ageing or damaged roofline components can lead to water ingress, rot, and structural issues. Our experienced installers carefully assess every property, addressing underlying problems before fitting high-quality uPVC roofline systems designed to withstand the British climate.

Modern uPVC roofline products offer exceptional durability, resisting warping, cracking, and discolouration. They require minimal maintenance while providing a clean, refined finish that enhances the look of your home.

We take pride in precise installation and attention to detail, ensuring effective drainage, ventilation, and long-term protection. All roofline work is backed by a 10-year guarantee, giving you complete peace of mind.

Roofline upgrades are a practical investment, protecting your property while improving its appearance and longevity.

Start Your Transformation

Trusted Craftsmanship. Seamless Experience.

From conservatory refurbishments and roof upgrades to orangeries and roofline solutions, we deliver quality you can trust. Our experienced team manages every project with care, transparency, and attention to detail.
